

PANKAJ KUMAR — PREMIUM PERSONAL PORTFOLIO WEBSITE PROMPT

PANKAJ KUMAR — PREMIUM PERSONAL PORTFOLIO WEBSITE PROMPT

Build a premium, modern, highly polished single-page personal portfolio website for Pankaj Kumar. The website should function as a complete digital version of my professional CV.

Use the attached CV as the primary source for all professional information and use the attached profile photograph as my actual profile image.

IMPORTANT:

Do not invent certifications, awards, companies, employment history, project statistics, technologies, or other professional information that is not supported by my CV.

MY DETAILS

FULL NAME:

Pankaj Kumar

DESIGNATIONS:

Full Stack Developer | MERN Stack Developer

IMAGE ASSET

PROFILE PHOTO:

Use the attached image:

WhatsApp Image 2026-08-03 at 9.18.34 PM.jpeg

This is the actual profile photograph of Pankaj Kumar.

Use this image in:

- Hero/Landing section
- About Me section
- Profile/avatar areas where appropriate

Do NOT generate or replace the profile photograph with an AI-generated person.

The image should be displayed professionally with:

- Rounded/circular presentation where appropriate
- Premium shadow
- Subtle border
- Smooth entrance animation
- Responsive sizing
- High-quality rendering
- No unnecessary filters that alter the person's appearance

WEBSITE STRUCTURE

Create these sections:

1. Landing / Home
2. About Me
3. Work Experience
4. Education
5. Projects
6. Skills
7. Certifications
8. Achievements & Recognition
9. Contact
10. Footer

Use a sticky navigation bar with:

Home · About · Experience · Education · Projects · Skills · Certifications · Achievements · Contact

Enable smooth scrolling between all sections.

PAGE 1 — LANDING / HERO

Create a premium hero section.

Display:

PK

as the logo/initials.

Large heading:

Pankaj Kumar

Designation:

Full Stack Developer | MERN Stack Developer

Use the attached profile photograph as a prominent visual element in the hero section.

Introduction:

Results-driven Full Stack Developer with a B.Tech in Computer Science Engineering (AI-ML), focused on building scalable, secure, and user-centric web applications. Experienced in developing MERN and PHP-based applications, secure REST APIs, JWT authentication, role-based access control, and database-driven systems. Built and deployed 2+ production-ready projects and developed 15+ REST APIs with a strong focus on responsive UI, backend security, and clean code principles. Currently working as a Full-Stack Web Developer Intern at ITLC India Pvt. Ltd., contributing to production-grade applications and modern web development workflows. Passionate about building reliable software solutions and contributing to high-impact engineering teams.

PAGE 2 — ABOUT ME

Create a visually impressive About section with the profile photograph on one side and professional summary on the other.

Use the attached image:

WhatsApp Image 2026-08-03 at 9.18.34 PM.jpeg

About Me:

I am a Full Stack Developer with a strong foundation in modern web development, backend security, database management, and responsive user-interface development. I have hands-on experience working with React.js, PHP, MySQL, Tailwind CSS, REST APIs, JWT authentication, and role-based access control. My professional experience includes building production-grade applications at ITLC India Pvt. Ltd. and working on data engineering and visualization at HCLTech. I am currently pursuing a B.Tech in Computer Science Engineering with an AI-ML specialization from A.P.J. Abdul Kalam Technical University, Lucknow. My work combines frontend development, secure backend architecture, database optimization, API development, and clean coding practices. I focus on creating reliable, maintainable, and user-centric software solutions.

MISSION:

Build secure, scalable and user-centric software solutions while continuously improving full-stack development, backend security, database optimization and engineering practices.

VISION:

To become a highly skilled software engineer capable of designing reliable, scalable and impactful technology solutions for real-world problems.

Add buttons:

- Work Experience
- Education
- Projects
- Skills
- Certifications

PAGE 3 — WORK EXPERIENCE

Create premium interactive experience cards.

ROLE 1:

Full-Stack Web Developer Intern

Company:

ITLC India Pvt. Ltd.

Employment Type:

Internship

Duration:

Apr 2026 – Present

Responsibilities:

- Architected and maintained a production-grade full-stack web application using React.js, PHP, MySQL and Tailwind CSS.
- Engineered secure token-based JWT authentication.
- Implemented role-based access control (RBAC).
- Designed and integrated RESTful APIs.
- Optimized database query structures.
- Managed development workflows, version control and code reviews using Git & GitHub.

Achievements:

- Reduced overall data latency by 20% through database query optimization.
- Built secure administrative interfaces using JWT authentication and RBAC.

ROLE 2:

Data Engineering & Visualization Intern

Company:

HCLTech

Employment Type:

Internship

Duration:

Apr 2025 – Aug 2025

Responsibilities:

- Automated data cleansing and transformation pipelines using MS Excel.
- Designed and published interactive Power BI dashboards.
- Monitored business operational performance and trend metrics.
- Converted structured data into actionable business insights.

Achievements:

- Improved report generation speed and data accuracy by 30%.
- Developed interactive Power BI dashboards for operational performance and trend monitoring.

PAGE 4 — EDUCATION

B.Tech — Computer Science Engineering (AI-ML)

Institution:

A.P.J. Abdul Kalam Technical University

Location:

Lucknow, India

Duration:

2022 – 2026

CGPA:

7.0

Mode:

Full-time

Key Highlights:

- Computer Science Engineering with AI-ML specialization.
- Strong foundation in programming, databases, software engineering and web development.
- Practical experience through full-stack development and data engineering internships.

PAGE 5 — PROJECTS

PROJECT 01:

InfraVision

Organization:

ITLC India Pvt. Ltd.

Status:

LIVE PRODUCTION

Type:

Full-Stack Web Application

Technologies:

React.js

PHP

MySQL

JWT Authentication

Tailwind CSS

Description:

Engineered and launched a live production-deployed full-stack platform featuring robust administrative control panels and modular CRUD functionality.

Implemented secure authentication, role-specific interfaces, database optimization and hardened API endpoints to improve application reliability and security.

Key Outcomes:

- Production-deployed full-stack platform.
- Modular CRUD functionality.
- Secure token-based sessions.
- Role-based interfaces for Super Admin, Admin and Guest.
- Strict input validation.
- Rate limiting.
- Centralized error logging.
- Optimized relational database structure.

PROJECT 02:

Bhartiya Kisan Kranti Union Portal

Organization:

ITLC India Pvt. Ltd.

Status:

LIVE PRODUCTION

Type:

Full-Stack Web Portal

Technologies:

React.js

PHP

MySQL

REST APIs

Tailwind CSS

Description:

Developed and deployed a live production portal with a custom Content Management System for dynamically managing organizational communications and website content.

Key Outcomes:

- Live production deployment.
- Custom CMS.
- REST API development.
- MySQL database integration.
- Dynamic content management.
- Schema-based validation.
- Environment credential management.
- Security hardening against OWASP Top 10 vulnerabilities.

PAGE 6 — SKILLS

Create modern skill cards grouped into categories.

FRONTEND DEVELOPMENT:

HTML5 & CSS3 — 90%

JavaScript (ES6+) — 88%

React.js — 85%

Tailwind CSS — 88%

BACKEND DEVELOPMENT:

PHP — 82%

REST API Development — 85%

JWT Authentication — 82%

DATABASE:

MySQL — 85%

MongoDB — 78%

DEVELOPMENT TOOLS:

Git & GitHub — 88%

Postman — 85%

AI & ENGINEERING:

Prompt Engineering — 82%

Use animated progress bars.

Progress bars must animate from 0% to the assigned percentage when the section enters the viewport.

Percentage numbers should count upward together with the progress bars.

PAGE 7 — CERTIFICATIONS

The provided CV does NOT contain a verified certification list.

Therefore:

DO NOT create fake certifications.

Build the section structurally so real certificates can be added later.

When actual certificate images are supplied, display:

- Certificate name
- Issuing organization
- Date if available
- Certificate image
- View Certificate button

Do not generate fake certificate images.

The certification section should still look professionally designed even when certificates are not available.

PAGE 8 — ACHIEVEMENTS & RECOGNITION

Heading:

Achievements & Recognition

Subheading:

Professional experience, technical projects and measurable impact.

Create four animated statistic counters:

2+

Production Projects

15+

REST APIs

20%

Data Latency Reduction

30%

Report Speed & Data Accuracy Improvement

Achievement Card 1:

Title:

Production Full-Stack Development

Description:

Developed and deployed production-ready full-stack applications using React.js, PHP, MySQL, Tailwind CSS, REST APIs, JWT authentication and RBAC.

Achievement Card 2:

Title:

Database Performance Optimization

Description:

Optimized database query structures and achieved a 20% reduction in overall data latency.

Achievement Card 3:

Title:

Data Engineering & Visualization

Description:

Automated data cleansing and transformation processes, improving report generation speed and data accuracy by 30%.

Achievement Card 4:

Title:

Secure Web Application Development

Description:

Implemented JWT authentication, RBAC, strict input validation, rate limiting, centralized error logging and security practices addressing OWASP Top 10 vulnerabilities.

Do not create fake awards or fake achievement photographs.

PAGE 9 — CONTACT

Create a premium two-column contact section.

LEFT COLUMN:

SEND ME A MESSAGE

White/cream card with:

Full Name

Email Address

Subject

Message

Button:

Send Message

The form should send messages to:

kr.pankaj098419@gmail.com

Use floating labels.

When focused:

- Label moves upward.
- Accent colour appears.
- Underline animates from left to right.

Send button should have a premium shimmer animation on hover.

RIGHT COLUMN:

CONTACT INFORMATION

Use a dark navy panel with cream/light text.

Email:

kr.pankaj098419@gmail.com

Phone:

+91-8081098419

Location:

Lucknow, UP, India

LinkedIn:

linkedin.com/in/pankaj-kumar-83610

GitHub:

github.com/Krpankaj7447

Each contact row should slide slightly to the right on hover.

FOOTER

Display:

Pankaj Kumar

Tagline:

Full Stack Developer building secure, scalable and user-centric web applications.

Social icons:

GitHub

LinkedIn

Email

ANIMATION SYSTEM

Implement polished animations throughout the website.

HERO:

- Profile photo smoothly scales/fades into view.
- Text appears sequentially.
- CTA buttons slide upward.
- Social icons pop in one by one.
- Subtle background motion.

ABOUT:

- Profile image slides from left.
- Shadow bloom.
- Mission card 3D flip.
- Vision card 3D flip with 0.2s delay.
- Navigation buttons stagger upward.

EXPERIENCE:

- Cards alternate left/right entrance.
- Dark side panel opens like a curtain.
- Bullet points stagger.
- Hover lifts card approximately 6px.
- Company badge subtly pulses.

EDUCATION:

- Card drops from above.
- Slight rotation before settling.
- Highlight bullets animate sequentially.

PROJECTS:

- Project panel slides from left.
- Blur-to-sharp transition.
- Content fades in.
- Outcome cards appear sequentially.
- Technology pills bounce in.
- Hover creates subtle warm glow.

SKILLS:

- Cards scale from 0.85 to 1.
- Progress bars animate from 0 to actual percentage.
- Numbers count upward.
- Category icons rotate subtly on hover.

CERTIFICATIONS:

- Cards cascade vertically.

- Slight random rotation.
- Images zoom from 1 to 1.05.
- Mouse-follow tilt effect.

ACHIEVEMENTS:

- Cards scale from 0.7 to 1.
- Counters animate when entering viewport.
- Icons pop and glow.
- Warm border effect on hover.

CONTACT:

- Form enters from bottom-left.
- Contact panel enters from bottom-right.
- Fields animate sequentially.
- Underlines draw left-to-right.
- Button performs subtle initial pulse.
- Hover shimmer effect.

DESIGN DIRECTION

The overall design must look like a PREMIUM SOFTWARE DEVELOPER PORTFOLIO, not a generic template.

Use:

- Dark Navy
- Warm Cream
- Gold accents
- Clean white surfaces
- Subtle gradients
- Premium shadows
- Glassmorphism only where appropriate
- Rounded modern cards
- Large typography
- Strong spacing
- High-quality icons
- Minimal decorative elements

The attached profile photo has a navy background, so visually integrate the portfolio's navy/gold palette with the photograph.

Do not apply excessive filters to the photograph.

Keep the photograph natural and professional.

RESPONSIVE REQUIREMENTS

The website must work perfectly on:

- Desktop

- Laptop
- Tablet
- Mobile

Mobile requirements:

- Single-column layouts.
- Touch-friendly buttons.
- Responsive profile image.
- No horizontal overflow.
- Responsive navigation.
- Optimized animations.
- Readable typography.
- Proper spacing.
- Responsive project cards.
- Responsive experience timeline.

NAVIGATION

Use a sticky navigation bar.

Navigation:

Home

About

Experience

Education

Projects

Skills

Certifications

Achievements

Contact

Enable smooth scrolling.

Highlight the currently active section in the navigation using the gold accent colour.

On mobile, use a premium hamburger menu.

IMPORTANT DATA ACCURACY RULES

Use ONLY verified information from the uploaded CV.

Verified professional information includes:

Pankaj Kumar

Full Stack Developer | MERN Stack Developer

ITLC India Pvt. Ltd.

HCLTech

A.P.J. Abdul Kalam Technical University

B.Tech CSE (AI-ML)

2022–2026

CGPA 7.0

InfraVision

Bhartiya Kisan Kranti Union Portal

2+ production-ready projects

15+ REST APIs

20% data latency reduction

30% report generation speed/data accuracy improvement

Do NOT fabricate:

- Certifications
- Awards
- Companies
- Job roles
- Project statistics
- Education
- Client names
- Salary
- Fake testimonials
- Fake achievements
- Fake certificate images
- Fake professional experience

FINAL HERO

Create the final visual hierarchy around:

Pankaj Kumar

Full Stack Developer | MERN Stack Developer

Building secure, scalable and user-centric web applications.

Buttons:

View My Work

Let's Connect

Use the attached profile photograph prominently and professionally throughout the portfolio.

The final result should feel premium, modern, technically sophisticated, responsive, and suitable for presenting to recruiters, companies, clients and engineering teams.

Use smooth animations, excellent typography, consistent spacing, professional interactions and strong visual hierarchy throughout the entire website.
